REGISTERED DENTAL LABORATORY

A Pietermaritzburg-based laboratory is looking for a technician with at least 4 years of experience in fabricating orthodontic appliances and C&B wax-ups. Experience working on implants and CAD/CAM will also be advantageous. The candidate must be willing to hone theoretical and technical skills, and willing to learn new ones – we are eager to share our experience.

The candidate must be able to manage his or her time efficiently, as the environment requires multi-tasking, short turn-around times and the ability to work precisely and calmly under pressure. The basic salary ranges from R13500 to R19500 – depending on experience and skills of the technician.

The successful candidate will be required to come to the lab for a bench test, and will have a 3 month probation period.

(The candidate must note that proper basic orthodontic wire work skills are a prerequisite)

You can contact us on 033-3475106 (Promise)
